**REZNOR® LIGHT COMMERCIAL ROOFTOP UNIT A BRONZE WINNER IN  
THE 2017 ACHR NEWS DEALER DESIGN AWARDS**

*R7TQ takes bronze in light commercial equipment category.*

**St. Louis, July 31, 2017** – Reznor was recognized as a bronze winner in the light commercial equipment category in the 14<sup>th</sup> annual Dealer Design Awards sponsored by *The Air Conditioning Heating & Refrigeration News* magazine. Model R7TQ was recognized for its high value and flexibility.

“These awards give us a unique opportunity to recognize the outstanding research and development efforts that go into many of the products servicing the HVACR industry, and the awards issue gives our readers an opportunity to read about innovative installation and service solutions,” said Mike Murphy, publisher at *The ACHR News*.

The Reznor R7TQ is highly configurable. These units can be configured at the factory, so consultant engineers and design-build contractors can get the exact spec unit they need delivered to the job site. This model features 35 options per tonnage size – there are over 750,000 unit configurations available.

“We are honored to be selected as this year’s recipient of the bronze award for our new configurable rooftop product,” said David Street, vice president of engineering and product management at Nortek Global HVAC. “This award reinforces the positive feedback we have received from contractors.”

There were 81 entries in the 14<sup>th</sup> annual Dealer Design Awards. Winners were selected by an independent panel of contractors. Winning entries were featured in the July 24, 2017 issue of *The ACHR News*. This magazine is distributed nationally to over 33,000 HVACR contractors, wholesalers and other industry professionals.
