Packaged System
Roof or Slab Mount**

The Competitive Edge

What is the Reznor Edge?

The Reznor Edge: Reznor ultra-high efficiency packaged condensing gas heating/electric DX cooling system can be roof or curb mounted.

The unit can be easily converted from horizontal (downflow) to horizontal air flow.

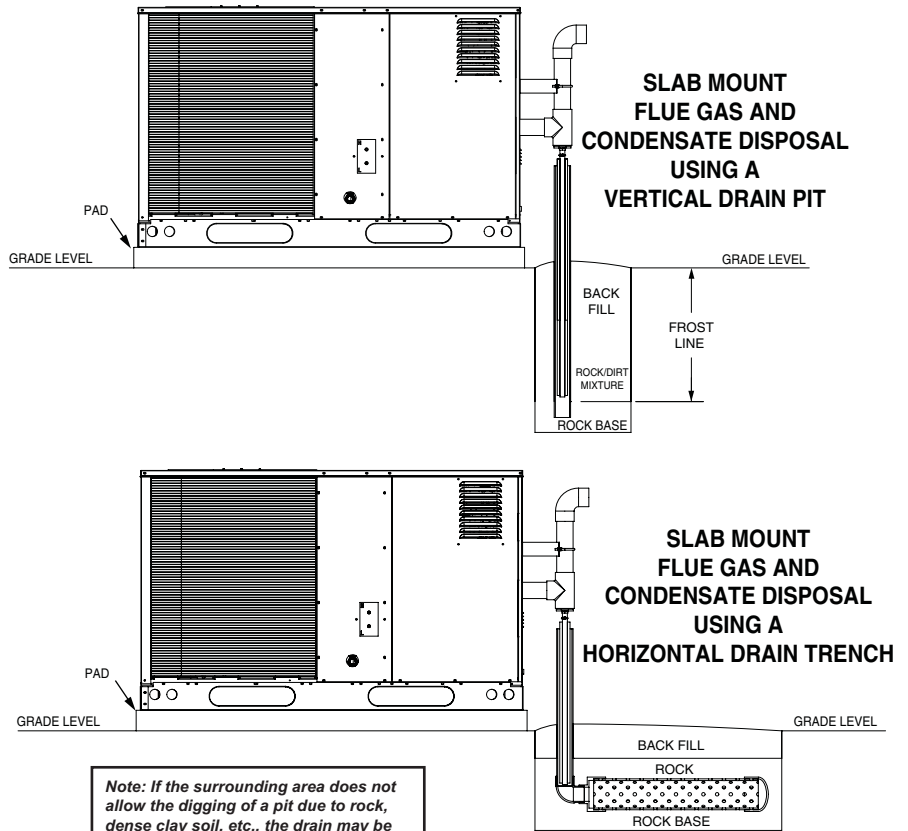

In slab mount applications, the condensate and flue gasses exit the unit together. While the flue gasses are exhausted to the outside air, the condensate is drained into the ground below the frost line. This eliminates any concern that the condensate will freeze (the photo above depicts the slab mount configuration).

Units are available in 2 to 5 tons cooling capacity with 60 to 96 MBH heating capacity.

If installed in SCAQMD only: These gas/electric packaged systems do not meet the SCAQMD Rule 1111 14 ng/J NOx emission limit (14 ng/J), and thus are subject to a mitigation fee of up to \$450. These gas/electric packaged systems are not eligible for the Clean Air Furnace Rebate Program: www.CleanAirFurnaceRebate.com.

Slab Mount
