IMPORTANT SAFETY INFORMATION

⚠ DANGER ⚠

This unit contains R-410A high pressure refrigerant. Hazards exist that could result in personal injury or death. Installation, maintenance, and service should only be performed by an HVAC technician qualified in R-410A refrigerant and using proper tools and equipment. Due to much higher pressure of R-410A refrigerant, DO NOT USE service equipment or tools designed for R22 refrigerant.

⚠ WARNING ⚠

IMPORTANT: Do not release refrigerant to the atmosphere! If required service procedures include the adding or removing of refrigerant, the service technician must comply with all federal, state, and local laws. Service procedures should only be performed by a qualified HVAC technician.

ELEVATION ADJUSTMENT OPTIONS FOR GAS ORIFICE REPLACEMENT

When gas orifice (see [Figure 14](#)) replacement is required on US installations, refer to [Table 20](#) and [Table 21](#) to select the appropriate elevation adjustment (AB) option.

NOTE: For Canadian installations below 2000 feet (600 meters), select option AB1. For Canadian installations above 2000 feet (600 meters), select option AB4.
