

REZNOR®

Equipment Start-Up Assistance

The Support Edge

What is the Reznor Edge?

The Reznor Edge: The peace-of-mind satisfaction that comes from knowing your unit performance is checked at start-up by a factory trained technician. This ensures that the unit meets the custom specifications detailed on your order.

Not every installer can be an expert in every type of HVAC equipment, especially some of the more specialized units like the Reznor Modular Air Processing System (MAPS®). With Factory-Assisted Start-Up, you can be certain that the process of commissioning the equipment can be handled efficiently and effectively.

Once start-up is completed, a copy of the original start-up form will be available for your files. The installing contractor receives a copy. We will also maintain a copy for future reference or warranty purposes.

In addition to the standard one year parts warranty, Factory-Assisted Start-Up also qualifies the unit for a one year labor warranty (purchased separately). To obtain start-up service and/or labor warranty, please specify this/these option(s) when ordering the unit.

If you are a contractor and would like to join the network of TNBGS premier service providers, contact us today.

For complete catalog information including submittals, energy calculations, dimension drawings, and more go to www.ReznorHVAC.com or call 800-695-1901.
