

## Reflector End Covers, Option CD27

Applies to: **Model VR**

### Description and Kit Components

The optional end covers are designed to “close” the vertical space on both the combustion chamber end and the exhaust heat exchanger end of the reflector length. End covers may be attached before the reflectors are installed or may be added to an existing installation.

#### Components

<b>Option Designation</b>	<b>CD27</b>	
<b>Option Package P/N</b>	<b>205762</b>	
Description	Qty	P/N
Reflector End Cover	2	268218
Screw #10-32 x 1/2" long	8	113275
Nut #10-32 Keps	8	26490

**FIGURE 1 - Reflector End Cover, P/N 268218**

#### WARNING

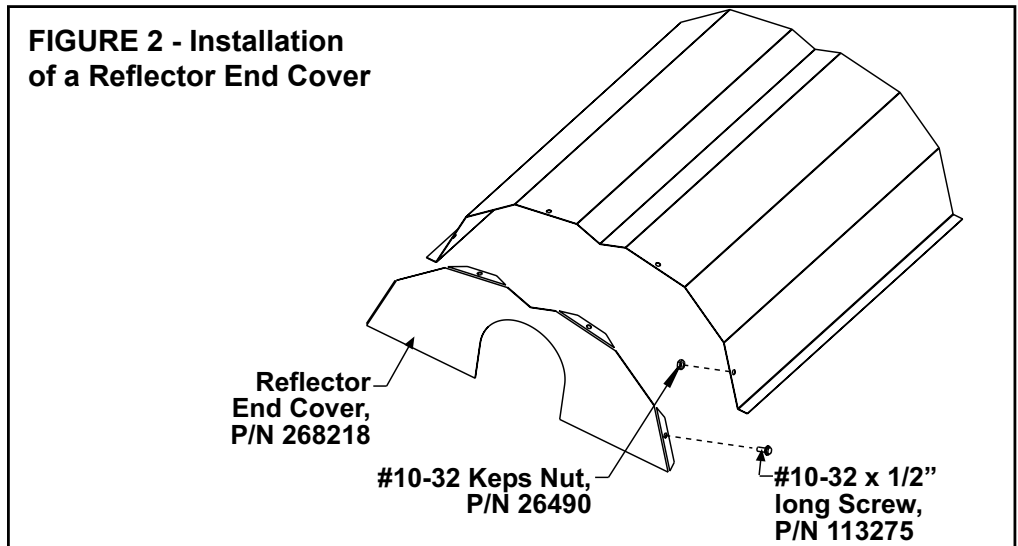

**The kit is to be installed by a qualified service person in accordance with these instructions and in compliance with all codes and requirements of authorities having jurisdiction. The qualified agency performing this work assumes responsibility for this installation.**

### Installation Instructions

■ **IMPORTANT:** If the optional reflector end covers are being added to a system that is already installed, turn off the gas and the electrical power. Allow the system to cool before installing reflector end covers.

1. Position the reflector end cover over the end of the reflector that will cover the combustion chamber tube. (See **FIGURE 2.**) Using the end cover as a template, mark the hole locations on the reflector.
2. Remove the end cover and carefully drill four 7/32" holes in the reflector.
3. Re-position the end cover and fasten to the reflector with four screws and nuts from the option package.
4. Repeat the process to install the cover at the exhaust end of the reflector.

If the system is already installed, turn on the gas and the electric and check for proper operation. If the system is being installed, continue with the instructions in the heater installation manual.
