Savings calculated based on the following conditions: 24 hour operation; Ambient temperature less than 65°F; Discharge air temperature setpoint of 75°F; 3,000 cfm; \$1.1 per therm (US), \$1.00 per therm (Canada); up to 93% gas efficiency compared to 77% average gas efficiency.

Other manufacturers' equipment operates at 80% fuel efficiency. When these contemporary units are modulated, they can drop below 72% efficiency. A fuel efficiency of about 77% is common for these type systems.
