

REZNOR®

The Unit Heater that will Save You Money

- Reduced Energy Costs
- Achieve LEED points
- Qualify for Utility Rebates

The Energy Edge

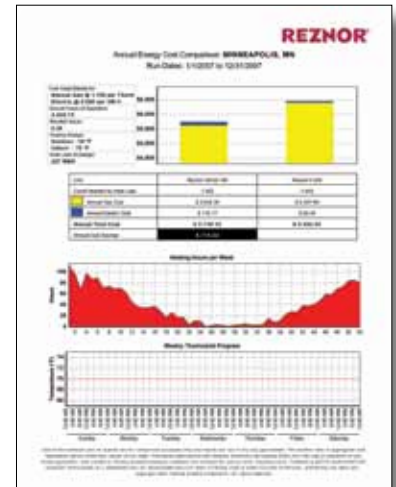

What is the Reznor Edge?

The Reznor Edge: Model UEAS saves energy and saves money by lowering utility bills. It can also earn LEED points. Many utility companies offer rebates on high efficiency equipment such as Model UEAS. All this adds up to a super fast return on investment.

City	MBH Heatloss	Yearly Hours	Savings
Anchorage, AK	232	2,700	\$1,024
Atlanta, GA	140	1,433	\$283
Bismark, ND	242	2,134	\$844
Boston, MA	174	2,110	\$513
Calgary, ALB	235	2,303	\$880
Chicago, IL	207	1,922	\$651
Cleveland, OH	187	1,996	\$610
Houston, TX	119	954	\$159
Minneapolis, MN	233	2,055	\$783
Pittsburgh, PA	183	1,982	\$593
Pueblo, CO	176	1,766	\$508
San Francisco, CA	91	1,613	\$253
Seattle, WA	129	1,742	\$388
St. Louis, MO	186	1,695	\$516
Toronto, ONT	202	2,290	\$752

This table shows the annual savings available when a Model UEAS180 is used in place of another manufacturer's less efficient unit heater. The practical and realistic savings include heat loss, gas thermal and electric usage and hourly rates based on accurate weather data.

Anthony Calverly (pictured, right) and his brother Jason of Calverly Supply in Michigan replaced two older gravity vented unit heaters with two Reznor Model UEAS units. Over the course of the next winter, they cut their natural gas usage by 23.8%.

Not only did this greatly reduce their heating bill, but it also helped to conserve some of our precious natural resources.

Jason Calverley said, "It was difficult to believe the savings when they were first calculated, but seeing the difference on our monthly gas bills is enough evidence for us. We are going to continue replacing the units in our own buildings with the Reznor Model UEAS unit heater. It just makes good financial sense."
